

NIRAJ DILIP CHAVAN

SENIOR SOFTWARE ENGINEER · FRONTEND-LED FULL-STACK · FINTECH & TRAVEL PLATFORMS

nirajd327@gmail.com · +91 96071 95436 · [linkedin.com/in/niraj-chavan-8267bb98](https://www.linkedin.com/in/niraj-chavan-8267bb98) · devnirajc.github.io · Pune, India

SUMMARY

Senior Software Engineer with 11+ years building large-scale frontend systems for fintech, travel, and enterprise platforms. Currently Lead Developer (SDE-III) at JP Morgan Chase, driving Angular architecture for Chase Travel — a platform serving millions of customers. Strong in Angular, React, TypeScript, and Node.js with a proven record of technical leadership: mentoring engineers, leading cross-team design reviews, and building reusable systems adopted at org scale. Expanding backend depth in microservices, cloud deployment, and AI-assisted development.

EXPERIENCE

Software Development Engineer III (Lead) · JP Morgan Chase & Co.

DEC 2021 – PRESENT · PUNE

Chase Travel — Promotions & Offers | Angular · TypeScript · Micro-frontends

- Lead Developer for the promotions and offers platform — drove 20% increase in customer bookings by delivering personalised offer rendering across Chase Travel serving millions of active users.
- Architected a reusable Angular component library for promotion rendering, adopted by 3 downstream squads; reduced UI duplication by ~40% and cut new-feature delivery time by one sprint cycle.
- Collaborated with backend teams on REST API design for the offers service, eliminating over-fetching and reducing average page load time by ~30%.
- Introduced micro-frontend module boundaries using Webpack Module Federation, enabling independent deployments across 4 squads and eliminating cross-team release coordination bottlenecks.
- Conducted weekly design reviews and code reviews for a team of 6 engineers; mentored 2 junior engineers on TypeScript best practices and Angular component architecture.
- Led WCAG 2.1 AA accessibility compliance audit and remediation across the Travel platform — implemented keyboard navigation, ARIA landmarks, and screen-reader support.

Site Manager — Travel Settings Customisation | Angular · RBAC · REST APIs

- Built dynamic settings dashboard eliminating engineering involvement in travel product configuration, reducing settings change cycle time from days to hours.
- Designed and implemented a Role-Based Access Control (RBAC) layer in Angular, scoping configuration permissions per business unit — zero privilege escalation incidents post-launch.
- Drove performance audit using Dynatrace and Kibana; fixed 3 rendering bottlenecks, improving Largest Contentful Paint (LCP) by 40% on the settings dashboard.

UI Developer · Schlumberger

SEP 2019 – DEC 2021 · PUNE

Field Logistic Module | Angular · TypeScript · Jasmine/Karma · Kibana

- Developed FLM application managing global logistics inventory for field operations, used by 500+ engineers across multiple geographies.
- Built real-time inventory tracking dashboard with Kibana-integrated data feeds, reducing inventory discrepancies by ~35% within one quarter of go-live.
- Achieved ~80% unit test coverage (Jasmine/Karma) and full E2E test suite (WebDriver/Allure), reducing QA regression cycle from 3 days to under 6 hours.
- Led Angular v8 to v11 upgrade — planned migration, coordinated with QA, and rolled out with zero production downtime.

Senior UI Engineer · Xpanxion International (UST Global)

JAN 2017 – SEP 2019 · PUNE

Retail Order Management System | Angular · Redux · Chart.js · REST APIs

- Designed and built full UI for inventory oversight and order management — reduced manual data entry errors by 50% over three months post-launch.
- Built real-time dashboards for inventory and order monitoring; adopted by operations team as the primary daily tool, replacing manual spreadsheet tracking.
- Introduced Redux for client-side state management, cutting data-inconsistency bugs by ~60% across 15+ complex UI screens.
- Mentored 2 junior engineers on Angular architecture, component composition, and REST API integration patterns.

- Implemented interactive in-video banner system for live product demos, increasing customer engagement by 25%.
- Delivered fully responsive UI components integrated with video SDK, supporting desktop and mobile playback.

- Built end-to-end Plot Booking System replacing manual paper-based reservations process; reduced booking errors to near zero.
- Delivered full-cycle development: requirements gathering, UI, backend integration, UAT, and production deployment.

PROJECTS

Prescription Builder — React · TypeScript · Node.js · MongoDB

- Doctor-facing prescription creation tool with drug search, dosage templates, and patient history — designed for clinic workflows.
- Fully accessible UI (WCAG 2.1), keyboard-navigable forms, and print-optimised layout for physical prescription output.
Live: [rxbit.vercel.app](#)

ShredTrack — Calorie Tracking App — React · Node.js · Express · PostgreSQL

- Full-stack nutrition tracker with meal logging, macro breakdowns, and weekly progress charts using Chart.js.
- REST API backend with JWT auth; deployed with CI/CD via GitHub Actions. Live: [shred-track-livid.vercel.app](#)

Personal Finance SaaS — Next.js · React · Node.js · Express · PostgreSQL · Northflank

- Expense tracking dashboard with budget alerts, category breakdowns, and month-over-month trend charts.
- Frontend migrated to Next.js (SSR) for improved performance; deployed on Northflank with CI/CD via GitHub Actions.

SKILLS

CORE FRONTEND	Angular · React · Next.js · TypeScript · JavaScript · HTML5 · CSS3/SCSS · Tailwind CSS
ARCHITECTURE	Micro-frontends (Webpack Module Federation) · Component design systems · WCAG accessibility · Performance optimisation (Core Web Vitals)
STATE & DATA	Redux / Redux Toolkit · REST APIs · GraphQL · React Query
BACKEND	Node.js · Express · MongoDB · PostgreSQL · Microservices · Docker · Kubernetes
TESTING	Jest · React Testing Library · Jasmine/Karma · WebDriver · Cypress · Playwright · Allure
TOOLING	Webpack · Vite · Git · GitHub Actions (CI/CD) · Dynatrace · Kibana · Grafana · Jira · Figma · LLM Suite · GitHub Copilot
PRACTICES	Technical leadership · Code review & mentoring · Agile/Scrum · Design patterns · Frontend system design

EDUCATION & CERTIFICATION

B.E. Computer Engineering

Dr. D. Y. Patil Institute of Engineering & Technology, Pune University · 2011–2014 · 63.89%

Diploma in Computer Engineering

Y. B. Patil Polytechnic, MSBTE, Pune · 2008–2011 · 83.03%

AWS Certified Cloud Practitioner

Amazon Web Services · Issued Dec 2023 · Expires Dec 2026 · [Credly badge](#)
